

DIY Telescopes

Recycle your cardboard tubes and make colour changing telescopes to hunt bugs with!

Step one:

Gather as many cardboard tubes you would like to make telescopes out of.

Step two:

Cut squares of coloured cellophane big enough to cover the end of the tube and to have a band over.

Step three:

Use an elastic band to secure one sheet of cellophane to each tube.

Step four:

Decorate if you like!

Mess Factor

2/10

Sedric Says

This craft provides a great opportunity to head outdoors and use the telescopes to go on adventure. Perhaps you'll spot a bug or two!

You will need:

- Cardboard tubes
- Coloured cellophane
- Elastic Bands
- Scissors

The Benefits:

- Attention is focussed.
- Helps to Identify individual objects and link them to vocabulary.
- Encourages conversation and questions.
- Can be used indoors or outside
